California Wild Flower Bulbs AND SEEDS

There are a few choice varieties of California Wild Flower Bulbs which have lengthy blooming season and are attractive enough to be welcome additions to the cultivated gardens. They should be more widely planted.

Bulbs are available in the Fall and Winter to very early Spring. Send us your order at any time and we will hold it until the proper time for delivery.

CALOCHORTUS

These beautiful little cup-shaped or globe-shaped flowers do wonderfully well in any good well drained soil but do not like manure. Leaf mold and grit will provide drainage if your soil is heavy.

Blossoming with their most showy and beautifully colored flowers during April and May, Mariposa Tulips have no equal. They are most excellent for cutting for the home with the graceful stems and nodding flowers. We offer a wide assortment of colors and shades. All bulbs sent postpaid to California points.
